

NETWORK HEALTH CHECK & INFRASTRUCTURE OPTIMIZATION WORKSHOP

Infrastructure Workshop

Microsoft's Active Directory: A Key Component of a Network Health Check

Microsoft's active directory is the cornerstone of your enterprise's infrastructure. Active directory controls the security for an organization, contains all the information needed to manage and categorize resources, and provides the ability to delegate control to simplify the management of users and resources. The Network Health Check and Infrastructure Optimization workshop provides a piece of mind! With Omicron's Health Check and Infrastructure Optimization Workshop, Omicron will provide a clear picture of the current state of the Enterprise's infrastructure foundation.

Our workshop includes in-depth analysis of network systems that support the directory and data communication structure of organization including:

- Forest and domain construction
- Directory Replication
- AD Convergence
- File Replication
- Backup and recovery functionality
- Domain controller configuration and Overall health and perfor
- Backup and recovery functionality
- Security and delegation
- System internal & external access
- Switching, routing and bridging
- Domain controller placement

Omicron's Network Health Check and Infrastructure Optimization Workshop Provides Peace of Mind

Detailed infrastructure state and recommendations - Omicron's workshop will provide a report on the current state of your Network Systems, Data Communications Structure and Active Directory along with practical recommendations that address specific performance or technology risk areas so that immediate, mid, and long-term remediation activities can be undertaken.

Knowledge sharing - During the workshop, your staff will work side-by-side with a experienced infrastructure consultants learning how to use the tools for the analysis as well as how best practices are applied to establishing and managing a sophisticated infrastructure such as yours.

Increased efficiency and performance - By increasing the efficiency of The Network Infrastructure and the effectiveness of IT management and support processes, you can improve your environment's stability, performance and up-time.

Omicron can help you get through all the decisions needed to enhance or re-structure your Network Infrastructure

Through a targeted, fast-paced workshop, Omicron can evaluate and analyze your current Active Directory and network infrastructure and guide you with your next steps. Methodology includes environment reviews, performance monitoring, requirements gathering and recommendations.
